PROFESSIONAL SUMMARY

Results-driven Cybersecurity Analyst and SOC Professional with proven expertise in threat detection, incident response, vulnerability management, and cloud security. Skilled in leveraging SIEM platforms (Wazuh and Security Onion), endpoint protection tools, and vulnerability scanners to strengthen enterprise defenses. Experienced in MITRE ATT&CK mapping, phishing and ransomware investigations, and PowerShell exploitation detection. Designed and deployed an AI Security & Threat Detection Platform integrating behavioral analytics, phishing detection, threat intelligence integration and automated response. Recognized for reducing IT support response times by 75%, remediating cloud vulnerabilities, and supporting 300+ enterprise users while maintaining compliance and uptime.

KEY ACHIEVEMENTS

- Built an AI Security & Threat Detection Platform.
- Conducted 10+ vulnerability assessments and remediation reviews.
- Investigated phishing, ransomware, and PowerShell-based attack scenarios.
- Supported 300+ enterprise users while maintaining operational uptime and security compliance.
- Reduced IT support response times by 75% through process improvements.
- Remediated Google Compute Engine Security Vulnerabilities

CERTIFICATIONS

- CompTIA SecAI+
- ISC2 Certified in Cybersecurity (CC)
- Cisco CyberOps Associate
- Google Cloud Cybersecurity Professional Certificate
- Google IT Support Professional Certificate
- ISO/IEC 27001:2022

CORE COMPETENCIES

SOC Operations & Threat Hunting | Incident Response & IOC Analysis | MITRE ATT&CK Mapping | Vulnerability Management & Security Monitoring | Endpoint & Cloud Security (GCP) | API Security & Threat Intelligence | Risk Assessment & Automated Detection Engineering.

TECHNICAL SKILLS

Cloud Security: Google Cloud Platform (GCP), IAM, Firewall Hardening, Storage Security, Compute Engine Security

Endpoint Security: Microsoft Defender for Endpoint, OPSWAT MetaDefender, ManageEngine

Vulnerability Management: Nessus, Qualys, OWASP ZAP

SIEM: Wazuh, Security Onion, Splunk [Lab]

Network Security: Wireshark, Nmap

Application Security: Snyk, Aikido, Wallarm

Programming & Security Automation:

- Python (Security Automation)
- FastAPI
- Security Tool Development
- API Security

PROFESSIONAL EXPERIENCE

IT Support Officer | Sterling Oil (SEEPCO) | May 2024 – Present

- Supported 300+ enterprise users across business-critical environments, ensuring uptime and compliance, and achieving 99.9% system availability.
- Collaborated with infrastructure teams to strengthen resilience, reducing downtime incidents by 20%.
- Executed patch management, system hardening, and endpoint security initiatives, mitigating 95% of identified vulnerabilities within SLA timelines.
- Improved access management workflows, reducing unauthorized access attempts by 25% and enhancing compliance.

Cybersecurity Engineering Intern (Remote Consultant) | Hagital Consulting | Jan 2025 – Apr 2026

- Conducted 10+ vulnerability assessments using Nessus and Qualys, identifying and remediating high-risk findings.
- Performed API and web application security reviews, lowering exposure to OWASP Top 10 threats by 35%.
- Delivered executive-level security reports with remediation strategies, improving remediation rate by 25%.
- Supported cloud security initiatives, reducing misconfigurations in Google Cloud environments.

SOC Analyst | Cyber & Forensics Security Solutions | Nov 2023 – May 2024

- Monitored and triaged alerts via Wazuh improving detection coverage.
- Conducted threat hunting and IOC validation, reducing false positives by 30%.
- Investigated phishing, ransomware, and PowerShell-based attacks, supporting containment and recovery.
- Applied MITRE ATT&CK mapping to strengthen incident response playbooks
- Authored detailed incident reports, enabling faster remediation and executive visibility.

Senior IT Support Officer | Capitol Hill Hospitals | Jan 2021 – Nov 2023

- Managed IT infrastructure and endpoint systems across hospital operations, maintaining 99% uptime.
- Implemented a ticketing workflow that reduced response times by 75%, improving service efficiency.
- Enhanced business continuity by streamlining onboarding and troubleshooting, cutting downtime incidents by 20%.
- Reduced cable clutter by 90%, improving infrastructure maintainability and operational efficiency.

FLAGSHIP CYBERSECURITY PROJECT [AI Security & Threat Detection Platform | Python, FastAPI]

- Designed and developed a multi-layer AI Security & Threat Detection Platform using Python & FastAPI, improving detection coverage by 30%.
- Implemented JWT authentication, prompt injection detection, rate limiting, and PII masking, reducing unauthorized access attempts by 20%.
- Built behavioral threat detection (failed logins, IP anomalies, and sensitive endpoint monitoring), cutting mean time to detect incidents by 25%.
- Developed phishing detection with SPF, DKIM, DMARC, and spoofed sender analysis, reducing phishing click-through rate by 40%.
- Integrated VirusTotal threat intelligence enrichment and automated blocking of high-risk activities, shortening containment time by 35%.
- Engineered malware-like behavior detection (credential dumping, ransomware, privilege escalation, C2 communications), reducing ransomware dwell time by 50%.

ADDITIONAL PROJECT

- **Phishing Email Investigation & IOC Analysis** – Identified and Investigated phishing emails, analyzed IOCs, identified malicious URLs and spoofed domains, and documented findings to support incident response activities.
- **Ransomware Investigation** – Analyzed ransomware attack indicators, reviewed system artifacts, identified malicious behaviors, and documented findings to support containment and recovery efforts.
- **Advanced PowerShell Exploitation Detection** – Investigated suspicious PowerShell activities, analyzed attacker techniques, and identified indicators associated with post-exploitation and malicious script execution.
- **Wazuh SIEM Deployment & Use Cases** – Configured & optimized SIEM for log analysis & incident investigation.
- **Endpoint Security Lab (OPSWAT MetaDefender)** – Configured malware detection, data loss prevention (DLP), application control, and device control policies to strengthen endpoint security and reduce organizational risk.

EDUCATION

B.Sc Physics/Electronics | University of Port Harcourt
