PROFESSIONAL SUMMARY

Cybersecurity Analyst with hands-on experience in SOC operations, incident response, threat hunting, vulnerability management, and cloud security. Skilled in SIEM monitoring (Wazuh, Security Onion), IOC analysis, MITRE ATT&CK mapping, malware investigation, and security automation. Designed and deployed an AI-powered Threat Detection Platform that improved detection coverage by 30% and reduced phishing click-through rates by 40%. Experienced supporting enterprise environments of 300+ users, strengthening security posture, maintaining compliance, and ensuring 99.9% system availability.

CERTIFICATIONS

- CompTIA SecAI+
- ISC2 Certified in Cybersecurity (CC)
- Cisco CyberOps Associate
- Google Cloud Cybersecurity Professional Certificate
- Google IT Support Professional Certificate
- ISO/IEC 27001:2022

KEY ACHIEVEMENTS

- Built an AI Security & Threat Detection Platform.
- Conducted 10+ vulnerability assessments and remediation reviews.
- Investigated phishing, ransomware, and PowerShell-based attack scenarios.
- Supported 300+ enterprise users while maintaining operational uptime and security compliance.
- Reduced IT support response times by 75% through process improvements.
- Remediated Google Compute Engine Security Vulnerabilities

CORE COMPETENCIES

SOC Operations & Threat Hunting | Incident Response & IOC Analysis | Vulnerability Management & Security Monitoring | Endpoint & Cloud Security (GCP) | API Security & Threat Intelligence | Risk Assessment & Automated Detection Engineering | **Frameworks:** MITRE ATT&CK Mapping | NIST CSF, NIST 800-61 | OWASP Top 10 | ISO 27001

TECHNICAL SKILLS

Cloud Security: Google Cloud Platform (GCP), IAM, Firewall Hardening, Storage Security, Compute Engine Security

Endpoint Security: Microsoft Defender for Endpoint, OPSWAT MetaDefender, ManageEngine

Vulnerability Management: Nessus, Qualys, OWASP ZAP

SIEM: Wazuh, Security Onion, Splunk [Lab]

Network Security: Wireshark, Nmap

Application Security: Snyk, Aikido, Wallarm

Programming & Security Automation:

- Python (Security Automation)
- FastAPI
- Security Tool Development
- API Security

PROFESSIONAL EXPERIENCE

IT Support Officer | Sterling Oil (SEPCO) | May 2024 – Present

- Supported 300+ enterprise users across business-critical environments, ensuring uptime and compliance, and achieving 99.9% system availability.
- Collaborated with infrastructure teams to strengthen resilience, reducing downtime incidents by 20%.
- Executed patch management, system hardening, and endpoint security initiatives, mitigating 95% of identified vulnerabilities within SLA timelines.
- Improved access management workflows, reducing unauthorized access attempts by 25% and enhancing compliance.

Cybersecurity Engineering Internship (Remote Consultant) | Hagital Consulting | Jan 2025 – Apr 2026

- Conducted 10+ vulnerability assessments using Nessus and Qualys, identifying and remediating high-risk findings.
- Performed API and web application security reviews, lowering exposure to OWASP Top 10 threats by 35%.
- Delivered executive-level security reports with remediation strategies, improving remediation rate by 25%.
- Supported cloud security initiatives, reducing misconfigurations in Google Cloud environments.

SOC Analyst | Cyber & Forensics Security Solutions | Nov 2023 – May 2024

- Monitored and triaged 100+ daily security alerts via Wazuh, improving detection coverage and reducing investigation time.
- Conducted threat hunting and IOC validation, reducing false positives by 30%.
- Investigated phishing, ransomware, and PowerShell-based attacks, supporting containment and recovery.
- Applied MITRE ATT&CK mapping to strengthen incident response playbooks
- Authored detailed incident reports, enabling faster remediation and executive visibility.

Senior IT Support Officer | Capitol Hill Hospitals | Jan 2021 – Nov 2023

- Managed IT infrastructure and endpoint systems across hospital operations, maintaining 99% uptime.
- Implemented a ticketing workflow that reduced response times by 75%, improving service efficiency.
- Enhanced business continuity by streamlining onboarding and troubleshooting, cutting downtime incidents by 20%.
- Reduced cable clutter by 90%, improving infrastructure maintainability and operational efficiency.

FLAGSHIP CYBERSECURITY PROJECT [AI Security & Threat Detection Platform | Python, FastAPI]

- Designed and developed a multi-layer AI Security & Threat Detection Platform using Python & FastAPI, improving detection coverage by 30%.
- Implemented JWT authentication, prompt injection detection, rate limiting, and PII masking, reducing unauthorized access attempts by 20%.
- Built behavioral threat detection (failed logins, IP anomalies, and sensitive endpoint monitoring), cutting mean time to detect incidents by 25%.
- Developed phishing detection with SPF, DKIM, DMARC, and spoofed sender analysis, reducing phishing click-through rate by 40%.
- Integrated VirusTotal threat intelligence enrichment and automated blocking of high-risk activities, shortening containment time by 35%.
- Engineered malware-like behavior detection (credential dumping, ransomware, privilege escalation, C2 communications), reducing ransomware dwell time by 50%.

ADDITIONAL PROJECT

- **Phishing Email Investigation & IOC Analysis (VirusTotal, URLScan, WHOIS)** – Investigated phishing campaigns, analyzed IOCs, and identified malicious URLs and spoofed domains.
- **Ransomware Investigation (Wazuh, Sysmon, Windows Event Logs)** Analyzed ransomware indicators, identified malicious activity, and documented findings to support containment and recovery.
- **Advanced PowerShell Exploitation Detection (Sysmon, Sigma Rules, PowerShell Logging, Base64-Encoded Command Analysis)** – Investigated obfuscated PowerShell activity and identified indicators associated with malicious script execution.
- **Endpoint Security Lab (OPSWAT MetaDefender)** – Configured malware detection, data loss prevention (DLP), application control, and device control policies to strengthen endpoint security and reduce organizational risk.
- **Wazuh SIEM Deployment & Use Cases** – Configured & optimized SIEM for log analysis & incident investigation.
